

Offensive Playbook

Passing Game: Hurricane (90 Series)

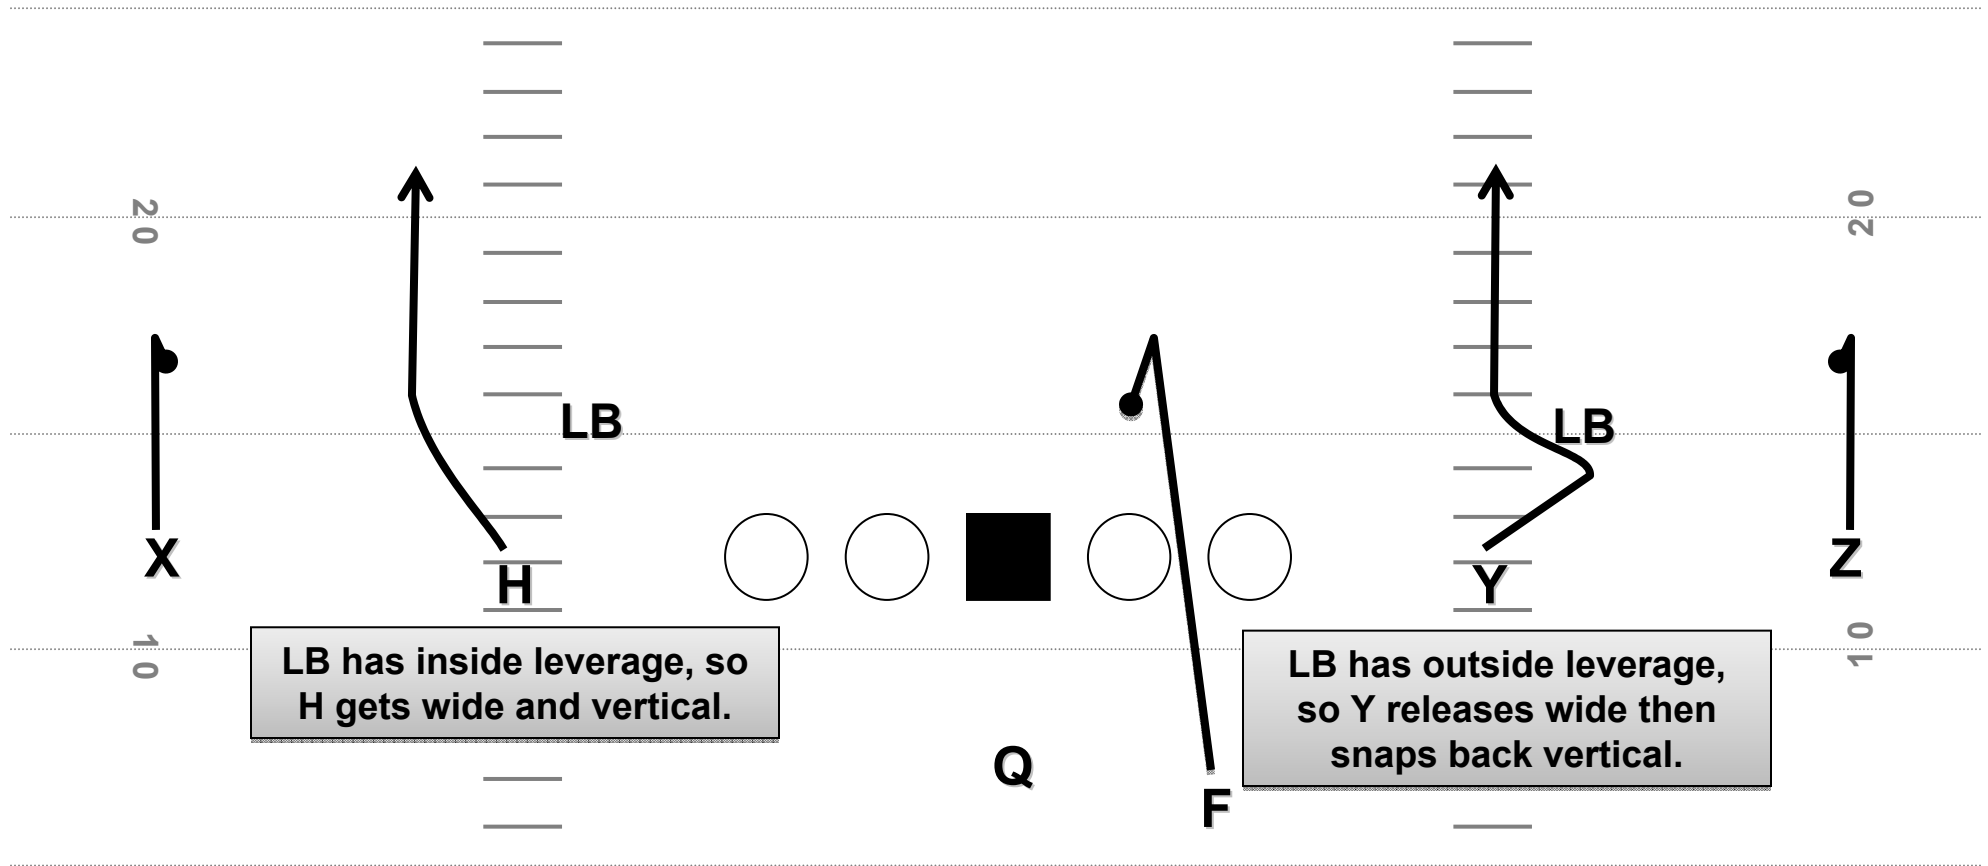

Hurricane

OSR Hitch / ISR Rail

Position	Base Rules
OSR	<ul style="list-style-type: none"> Hitch route. Show Vert, but stop sudden 5 yards from the LOS and turn toward the QB. Expect ball to be there as you turn. Against press coverage, look for a back-shoulder throw (OSR) or inside-shoulder throw (ISR).
ISR	<ul style="list-style-type: none"> Rail Route: <ul style="list-style-type: none"> Against defender with inside leverage, get wide and vertical. Against defender with outside leverage, release wide to widen him even more, then snap back inside and get vertical on the hash. In Trips: #3 WR (counting outside in) is responsible for the #2 WR route on the opposite side. Get across the field fast and turn it up on the hash.
F	<ul style="list-style-type: none"> Checkdown receiver.
QB	<ul style="list-style-type: none"> 90-Series (quick) pass. Catch and throw. Read Progression: Rail – Hitch – Checkdown. Choose a side pre-snap based on best grass. Read the hole defender. If he has inside leverage, allow the ISR to widen and get vertical, then drive the ball. If the Rail is covered, drive it to the Hitch. In Trips: Pre-snap, read the isolated WR (gift if poorly covered) & #3 WR.

Ace 90 Hurricane

Jag Left 91 Hurricane
